

# Electric vehicles & charging infrastructure 2025-2030

Report Authors: ZCA research team

|                                                                                                                           |    |                                                                               |    |
|---------------------------------------------------------------------------------------------------------------------------|----|-------------------------------------------------------------------------------|----|
| 1. Foreword.....                                                                                                          | 8  | 3. Electric vehicles.....                                                     | 19 |
| Executive Summary.....                                                                                                    | 9  | 3.1 Introduction .....                                                        | 19 |
| 1.1 Overall EV adoption forecast to grow over the next 5 years;<br>however, BEV sales have shown a recent slow-down ..... | 9  | 3.2 Electric vehicles.....                                                    | 19 |
| 1.2 Tariffs .....                                                                                                         | 9  | 3.3 Sector analysis.....                                                      | 20 |
| 1.3 New battery technology could rejuvenate EV sales .....                                                                | 9  | ix. Light commercial vehicles: passenger cars, small trucks and<br>vans 20    |    |
| 1.4 Charging infrastructure needs to keep pace.....                                                                       | 10 | x. Commercial vehicles: electric HGVs, large vans & trucks and<br>buses ..... | 20 |
| 1.5 Other major differences between ZCA's 2025 & 2024 reports                                                             | 10 | Case study: AFP & shared charging.....                                        | 21 |
| 2. Introduction to EVs and charging infrastructure .....                                                                  | 12 | Case Study: ACCESS.....                                                       | 22 |
| 2.1 Driving change .....                                                                                                  | 12 | xi. Protectionism & tariffs.....                                              | 23 |
| Figure 1: The top 5 polluting industries .....                                                                            | 12 | Figure X: Current EV duties imposed by major economies* .....                 | 23 |
| 2.2 Country analysis.....                                                                                                 | 13 | Figure X: Leading EV manufacturers and their country of origin..              | 24 |
| Figure 2: Key dates and targets for the phasing out of ICE vehicles<br>in major economies.....                            | 13 | xii. Reshoring and Nearshoring.....                                           | 24 |
| Figure 3: Global transport emissions by country (%).....                                                                  | 14 | Case Study: JLR (Jaguar Land Rover) .....                                     | 25 |
| i. Canada .....                                                                                                           | 14 | xiii. Battery technology.....                                                 | 25 |
| ii. China .....                                                                                                           | 14 | a. Lead-acid .....                                                            | 25 |
| iii. European Union .....                                                                                                 | 15 | b. Lithium-ion .....                                                          | 26 |
| iv. India .....                                                                                                           | 16 | c. Nickel-metal Hydride .....                                                 | 26 |
| v. Japan .....                                                                                                            | 16 | d. Solid-state .....                                                          | 26 |
| vi. South Korea.....                                                                                                      | 16 | e. Ultracapacitors.....                                                       | 27 |
| vii. United Kingdom .....                                                                                                 | 17 | f. Na-NiCl <sub>2</sub> .....                                                 | 27 |
| viii. United States.....                                                                                                  | 17 | xiv. Challenges and constraints .....                                         | 27 |

|                                                                                                        |                                                |    |
